

RITE TRACK

Rite Track encourages students to build bright and meaningful futures for themselves and works to connect them to resources that can help them succeed. Research has shown that students who pursue a post-secondary education or vocational training earn significantly more over the course of their career and are more likely to gain employment in their field of interest.

To promote the many available post-secondary options, Rite Track recently brought students to tour the Job Corps facility in Imperial Beach, CA. Since 1964, Job Corps has worked to help young people succeed and during their five decades of operation has expanded to offer training in relevant and growing fields. The tour allowed students to explore the many vocational programs available to them including Nursing, Auto Mechanics, Welding, Construction, Plumbing, Information Technology, Finance and Business. Job Corps' impressive facilities allow students the opportunity to gain hands-on experience that will prepare them for a meaningful career doing something they love.

Rite Track is committed to helping our students succeed and will continue connecting them to resources and opportunities that will guide them toward the bright futures they deserve.
